

Visualization/ Goals as outlined today:

/home/

- missions (returns a list of missions in the form: /home/mission/mission_name)
 - {mission} return a list of children: kernels, metakernels, misc
 - /home/missions/{mission}/kernels
 - kernels (list of the available kernels)
 - ik (list of the available ik kernels? as a URL)
for each file in the above list the endpoints are {file}
 - hash
 - raw
 - local filepath
 - year
 - newest
 -
 - spk
 - ck
 - ...
 - metakernels
 - All of the metakernels
 - as above for ik
 - misc
 - READMEs, other crap
- hash
- update
- naif
