notes – 9/22/17

priorites
     - Uptime
     - Communication between sites
No front end.
     - mainly back end.
     - want us to stay away from front end.
Will be used by admin/staff. Not end users.
Waterfall design documents.

Spice - our "GPS"
     - binary and text files
     - integreting checking
     - facility to facility
     - not just a file checker.
     - like "open street map"
     - take existing solutions and peice them together.
     - requirement
          - docker containment. containerization. docker.
     - cross platform
     - Pyton or Node
     - Flask - pyton library?
     - bottle?
     - getLargeFile?
     - midigate r-sync commands.

Use the file system. Don't need to use a database.
Meta kernals - pointer to the data
kernals - is the data.

get J our GIT handles.

how to hook up TRAVIS.
