## TASKS COMPLETED since last meeting:

Task Title: DR2 Group Review Task	Task Initiation:	Orig. Due	Status: 100%
	02/28/2021	Date:	
		03/05/2021 @	
		Noon	
Who (%): Each team member 25% (team task)			
<b>Description:</b> The team needs to review the DR2 presentations for teams Fridgefiller and GlaciesIndicium.			
<b>Expected Outcome:</b> Each team member should review the two teams' DR2 video presentations alone. Then we meet			
as a team on Tuesday to create the reviews as a	team to submit for gr	ading.	

Task Title: Coding: Recommendation	Task Initiation:	Orig. Due	Status: 100%
Algorithm	02/15/2021	Date:	
		03/06/2021 @	
		Midnight	
W/L = (0/), C = 41, 1000/			

wno (%): Seth 100%

**Description:** The recommendation algorithm needs to span the app and the website. The app should provide a room or room object, and limitations, and send these to the website. The website should use the criteria to search the database using the search feature and aggregate a list of results. These results should be returned to the app to be displayed.

**Expected Outcome:** When selecting a room or room object in the app, the request for associated AT devices to recommend should be returned by the server as a JSON object.

Task Title: Coding: Display	Task Initiation:	Orig. Due	Status: 100%
Recommendations	02/15/2021	Date:	
		03/08/2021 @	
		Midnight	
Who (%):			
Ethan 50%			
Seth 50%			
<b>Description:</b> The results from the recommendation algorithm should be displayed to the user on the app.			
F			

**Expected Outcome:** The results of the recommendation algorithm are returned as a JSON object. Each result in this JSON should be shown to the user in a separate view as a list. Clicking on a result should show more details about that AT device. Need to also have a button to add that AT device to the user's favorites, and show the relevance rating for each device in the recommendations list. Also needs a button to share recommendations with local resources.

Task Title: Coding: User Feedback	Task Initiation: 03/01/2021	Orig. Due Date: 03/08/2021 @ Midnight	Status: 100%
Who (%): Ethan 50% Seth 50%		Wildingitt	
<b>Description:</b> App needs to provide a way for the user to suggest AT devices that are not in the inventory.			
<b>Expected Outcome:</b> In the recommendations results view, there is a button for the user to click that opens a new view. This new view has fields for the new AT device name, description, and URL. This recommendation is then saved in a table on the server for the admins to review.			

Task Title: Coding: Admin Surveys	Task Initiation:	Orig. Due	Status: 100%
	03/01/2021	Date:	
		03/08/2021 @	
		Midnight	
Who (%):			
Ethan 50%			
G 4 500/			

**Description:** Admins can send Qualtrics surveys to the user by making an entry in the database using the website. **Expected Outcome:** Admin enters a new survey in the admin website with a URL to the Qualtrics survey. When the app checks the database and finds a survey, it makes it available to the user along with the admin messages. When the user clicks on the link provided, it opens a browser on the user's device to complete the survey.

Task Title: Clean up search page in website	Task Initiation:	Orig. Due	Status: 100%
	03/01/2021	Date:	
		03/05/2021 @	
		Noon	
Who (%): Noah 100%	•	•	

**Description:** The search page in the admin website is clunky, missing labels, and hard to understand. We would like this to be more intuitive for the upcoming demo.

**Expected Outcome:** The search fields should be aligned horizontally, preferably with column headings. The checkbox column should have a label/heading to say what it is for.

## This week's Tasks: Work plan for coming week

Task Title: Coding: Security	Task Initiation:	Orig. Due	Status: 75%
	03/01/2021	Date:	
		03/08/2021 @	
		Midnight	
Who (%):			
Courtney 100%			
<b>Description:</b> Implement encryption of sensitive data in database and plan for database backup/restoration.			
<b>Expected Outcome:</b> Admin username are actually email addresses and need to be encrypted when saved. App			
username and password needs to be encrypted when saved and decrypted for user app login. Need an automated script			
to make backups of the database via CRONTAE	to make backups of the database via CRONTAB. Need a script to easily restore a backup of a database.		

Task Title: Coding: Accessibility	<b>Task Initiation:</b> 03/01/2021	Orig. Due Date: 03/08/2021 @	Status: 80%
Who (%):		Midnight	
Ethan 100%			
<b>Description:</b> App needs accessibility opt themes.	ions for large fonts, text-to	-speech, speech-to	o-text, and different color
Expected Outcome: App forwards user	to the OS's accessibility se	ttings for large for	nts, text-to-speech.
Speech-to-text depends on the user havin various color blindness, the app needs to	2	1	3

<b>Task Title:</b> Fill live server website with data for the demonstration	Task Initiation: 03/05/2021	Orig. Due Date: 03/12/2021 @ 13:00	Status: 50%
Who (%): Noah 50%; tables of General Limitations, Messages and Surveys Courtney 50%; tables of AT Devices, Room Objects, State Resources			
<b>Description:</b> To prepare for our alpha prototype tech demo, we need our live website on the Azure server populated with data for the demonstrations. The data can be real or fake but needs to make sense.			
<b>Expected Outcome:</b> Our project website at <a href="http://52.151.14.66/">http://52.151.14.66/</a> has sufficient entries in the tables specified here to demonstrate that our alpha prototype meets the functional requirements.			

Task Title: Peer Evaluation 2	Task Initiation: 03/05/2021	Orig. Due Date: 03/12/2021 @	Status: 0%
		Noon	
Who (%): Each team member must complete one.			
<b>Description:</b> The second peer evaluation covering tasks since the Software Design deliverable.			
<b>Expected Outcome:</b> Each team member will have filled out the second table of their peer evaluation document and			
submitted to the team mentor no later than the c	lue date.		

## **Upcoming Tasks: Planning**

Task Title: Full Prototype	<b>Who (%):</b> Team 100%	<b>Rough Due Date:</b> 03/15/2021		
Tech Demo				
<b>Description:</b> The team performs a tech demo for the alpha prototype to show that it satisfies all functional				
requirements.				

Task Title: Design Review 3	<b>Who (%):</b> Team 100%	<b>Rough Due Date:</b> 03/26/2021	
<b>Description:</b> Design Review 3 presentation			

Task Title: Software Testing	<b>Who (%):</b> Team 100%	<b>Rough Due Date:</b> 03/26/2021	
Plan			
<b>Description:</b> Testing Plan deliverable
