Discussion:

The team went out to a dry lake bed to perform the first flight attempts. It did not go so well. The team realized the wheels were causing too much drag and the front landing gear was not durable. The team also came to the conclusion that it would be difficult to get the plane to fly before the competition, and decided to not go to the competition.

Next week expectations:

Lucas: Build and redesign front landing gear.

Conor: Build and reduce the angle of attack on the wings.

Ahmad: Build

Saood: Finalize battery and motor that will be used for the final design.

Michael: Build and redesign rear landing gear.
